

# EEX Emissions Auctions

## **New: EEX and Belektron launch cooperation to facilitate indirect access to Primary Market Auctions at EEX**

- Belektron provides indirect access to the EEX Emissions Auctions for all operators of EU ETS installations and aircraft operators
- The cooperation has been jointly developed between Belektron and EEX, guided by the common aim to achieve greater transparency and ensure equal treatment of clients.
- Customer support is provided in multiple European languages (English, French, Italian, Polish, Croatian, Slovenian)

## Products for Emissions Auctions

EEX runs primary auctions of emission allowances which are held on up to five days per week on behalf of the European Commission and 25 EU member states as well as Germany and Poland.

EUA (EU Emission Allowances)  
EUAA (EU Aviation Allowances)

*“The EEX auctions are an important purchasing channel for EU ETS operators, and intermediaries play a key role in aggregating demand. What we see is an increasing need – especially from SMEs – to gain access to the carbon market in an easy, fair and transparent way.”*

Boštjan Bandelj, Director Belektron

*“Belektron has been a reliable partner for EEX for several years. We are very pleased to collaborate with Belektron in order to improve indirect access to the auctions, as their offering is intended to achieve greater transparency and equal treatment of clients.”*

Steffen Köhler, Chief Operating Officer,  
Managing Director Exchange

---

More information on access to the auctions and a list of emissions intermediaries is available at: <https://www.eex.com/en/products/environmental-markets/emissions-auctions/overview>
